ABSTRACT

Project CLOVER (Computerized Link Offering Variable Educational Records) is a demonstration project designed to increase use of the Migrant Student Record Transfer System (MSRTS). Project CLOVER (1) helps to ensure that schools attended by migrant students have the capability to receive and transmit academic and medical information on students; (2) informs schools and other educational and health organizations serving migrant students about the benefits of the MSRTS computer system; (3) trains appropriate school/agency personnel; (4) provides follow-up assistance and monitoring of areas utilizing the system; (5) conducts evaluations of system use and training; and (6) provides computer services, as negotiated. The booklet outlines responsibilities of MSRTS/CLOVER and explains eligibility for the project and responsibilities of project users. It discusses the four elements of the MSRTS process--enrollment, withdrawal, updating, and inquiry; issues of personnel selection; and training procedures. The booklet explains content and use of Migrant Student Health Records and the Migrant Student Education Records contained on MSRTS/CLOVER and presents samples from the MSRTS Academic Skills Booklets used to code student skills. The use of codes for the medical and educational records is explained. Samples of the Migrant Student Educational Record, Migrant Student Health Record, and Health Data Entry Form are included. (LFL)

Background

Prior to 1968, there was a lack of continuity in the educational program for migrant children throughout the states. In that year, representatives from 37 states held a conference to discuss this and other problems, including that of transferring educational information about migrant children from one state to another—from one teacher to another.

The Record Transfer Committee, established out of this conference, was charged with two responsibilities: 1) to design an appropriate student record and 2) to design a transferal system. The conference also asked the United States Office of Education to serve as the contracting and monitoring agency for the system.

The first year of full-scale operation for MSRTS was in 1972 and the number of children on the data base that year was 311,371. Since that time, a comprehensive information system that has proven responsive to the needs of both migrant children and the users of the system has been operating out of Little Rock, Arkansas—with satellites in 49 states, Puerto Rico and the District of Columbia. Approximately 750,000 migrant students are being served by the System today.

A. What is the Migrant Student Record Transfer System?

The Migrant Student Record Transfer System (MSRTS), is a computerized information network which maintains and transfers education and health data from one school to another as migrant children move with their families. The primary purpose of the system is to assist the education and health communities in providing continuity of services for the migrant child.

B. Project CLOVER is. . .

The Computerized Link Offering Variable Educational Records, Project CLOVER, is a Developer/Demonstrator Project sponsored by the MSRTS. It is designed to increase the use of the MSRTS by schools and organizations which already serve migrant students, but may or may not be aware of the services made available by the System.

Project CLOVER helps to ensure that each school attended by a migrant student has the capability to receive and transmit academic and medical information on the student, thus, eliminating the problem of omission of vital information.

. . .How it Works

Project CLOVER informs schools and other education and health organizations which serve migrant students about the benefits of the MSRTS computer system. If an interest in receiving MSRTS service is acknowledged, Project CLOVER will train the appropriate school or agency personnel in the complete MSRTS process. The schools and organizations, once they begin use of the service, are placed on the MSRTS computerized data base and become project "adopters."

. . .Responsibilities of the MSRTS/ CLOVER

A summation of the role Project CLOVER plays in the adoption by a school or organization includes:

- 1) The training of User/Adopter personnel in the MSRTS/CLOVER process;
- 2) The provision of educational and medical records, which will include the reading, math, early childhood and oral language skill areas;
- 3) Provision of training manuals for User/Adopter personnel. (Skills training manuals may be purchased by the adopter from MSRTS);
- 4) The provision of follow-up assistance and monitoring of areas utilizing the system;
- 5) Evaluation of training workshops-providing adopters with sample models and methods for evaluation of adoptions;
- 6) Collection of information on adoptions as needed by the National Diffusion Network;
- 7) Providing management reports to appropriate offices;
- 8) Provision of computer services as negotiated;
- 9) Provision of critical data upon request within 24 hours; and
- 10) Provision of operation procedures for MSRTS/CLOVER.

C. How to Become a Project CLOVER 'Adopter' — Who is eligible?

Any school, agency or organization with *migrant students enrolled in their program is eligible to receive the services of the Migrant Student Record Transfer System/Computer Link Offering Variable Educational Records.

Schools or organizations already on the MSRTS Data Base, but are "retrained" in the utilization of the system, are also eligible adopters of Project CLOVER.

Project CLOVER informs schools and other education/health organizations which serve migrant students about the benefits of the MSRTS computer system. If an interest in receiving MSRTS services is acknowledged, Project CLOVER will train the appropriate school or agency personnel in the complete MSRTS process. Once the school or organization begins receiving the services and are placed on the MSRTS computerized data base, they become Project CLOVER adopters. A short school identification code of six letters is then assigned to the adopters by the state's director of migrant education and the CLOVER office.

*To determine the eligibility of a migrant child, the following information must be verified: 1) There must be an adult migrant worker with whom the child moved (or moved to join); 2) The move made must have been across a school district or a state boundary; 3) The move must enable the adult worker (parent or guardian) to obtain temporary or seasonal employment in agriculture or fishing related activities; and 4) The objective of the move, the work activity, must qualify under the migrant program. (See Occupations for Migrant Workers' Manual).

If the child is determined to be a migrant, the MSRTS process may be used to enroll, update, inquire or withdraw the student.

D. What are the responsibilities of the adopters in the implementation of the System?

The success of the MSRTS/CLOVER on a national level depends entirely on the success of each school or agency's implementation of the System.

School administrators and other personnel are directly involved in the day-to-day operation of the CLOVER project at the local level.

There are four vital elements of the MSRTS process:

- 1) **Enrollment:** This is done at the school level by an appointed staff person.

Through this process, critical data is sent to the User/Adopter within hours of the request (critical data is information which is vital to the migrant child's immediate placement and may be called back to the school within 24 hours). Critical data includes name, sex, birth-date, blood pressure, tuberculin test, urgent health conditions, last school attended and basic skills;

- 2) **Withdrawal:** This process assists in the tracking of migrant children and serves as a check-point in the enrollment and updating processes. This procedure is usually done by a school staff person or MSRTS employee.
- 3) **Updating:** Through updating, User/Adopters are provided with current information required to properly administer to the needs of the migrant children;
- 4) **Inquiry:** In this process specific requests for information on the students' record(s) are made. It also permits User/Adopters to request and obtain answers to specific questions about the child. This can be accomplished by calling the MSRTS Toll-free number (1-800-643-8258).

. . . Personnel Functions at the Local Level

The selection of personnel to work with Project CLOVER at the local level is usually done through needs assessment—by Project CLOVER'S administrative personnel and the local administrators. Other times selection is based entirely on the availability of personnel at the local site.

The most likely candidates for Project CLOVER contact people or *certified trainers are:

- 1) **School superintendents**, whose role may be an indirect one, based on the availability of personnel at the local level. The superintendent is the primary contact person for the school system and is asked for authorization to disseminate materials concerning the project;
- 2) **School Principals** are more often the persons authorized by the superintendent to communicate with the Project CLOVER office and to make decisions concerning involvement with the project;
- 3) **School counselors** may be appointed as contact persons or certified trainers for the project, based on their contact with the entire school body, and also based on the fact that the process may be in line with their general duties;
- 4) **Classroom teachers/teacher's aides**, the fourth possible liaison, are often responsible for all elements of the MSRTS process. Their day-to-day contact with the migrant students is believed to give them a better understanding of the complete process.
Teachers' aides are especially good candidates based on the amount of time they would have to complete the necessary process for the student(s).

- 5) **Nurses/health aides** are valuable assets to the process, based on their medical background. Once the basic knowledge of the records is attained, the nurses' contribution in processing the forms would be invaluable.

Other personnel may be utilized from time to time depending on availability of the above persons.

... A summation of the responsibilities of the adopting school or organization includes:

- 1) To designate contact person(s) to serve as liaison(s) between the MSRTS and the adopter.
- 2) To allow time for personnel to attend in-service training.
- 3) To evaluate the process once it is implemented (through quarterly reports).
- 4) To provide the MSRTS and/or the National Diffusion Network (NDN) with information on the adoption. (Written reports on quality of service as well as statistical information).
- 5) To provide facilities and resources to house in-service sessions.
- 6) To designate medical addresses if different from the contact person.

*Certified trainers are persons designated by Project CLOVER to be responsible for the training of personnel in the MSRTS process, either during a training workshop or during a one-to-one session. Records of the training sites, training dates and training participants should be maintained by the certified trainers for Project CLOVER's annual report.

E. Training

Training is an intricate part of the MSRTS/CLOVER process, and may be done on a regular schedule (MSRTS quarterly workshops; stream conferences; local workshops, etc.) or on an as needed basis.

Persons responsible for training may include MSRTS coordinators, supervisors, administrators, certified trainers, data entry operators' supervisors, Health supervisors/administrators, CLOVER administrators and others.

Trainees may include new or veteran migrant education personnel (clerks, aides, data entry operators, health personnel, and administrators).

The training curriculum includes *the MSRTS Education and Health Records, the Data Entry Operators Manual, the MSRTS User's Manual (Health and Education), and the *MSRTS Academic Skills List.

Migrant Student health Record

The purpose of the Migrant Student Health Record (MSHR) is to provide users with a comprehensive medical profile of the client/student. Health information is reported to the MSRTS using diagnostic codes from the International Classification of Diseases (ICD.9CM) and procedure codes from the Current Procedural Terminology (CPT—4) manual.

By using these universal codes, communication between health providers and users is facilitated, and health data is uniformly reported. All information can be entered into the system, without restriction, by any user and will be stored in the MSRTS exactly as it is submitted. However, all the information may not be printed on the Migrant Student Health Record, since each state has a degree of control over the type of medical information it wants to receive.

The medical record keeper (at a site) will automatically receive one copy of the MSHR when a student arrives in the area or enrolls at a school and is reported to the MSRTS. Updated health records may be requested at any time, but the data entry specialist must have the child's last name, first name middle initial and student identification number.

Migrant Student Education Record

The Migrant Student Educational Record is comprised of student identifying data and academic information entered on the MSRTS. The purpose of the Educational Record is to provide users with a comprehensive educational profile for each student. Additionally, limited medical information may also appear on the record if a health condition exists which may affect the student's academic performance. This record can be used as an input document to enter additional information or alter data previously entered.

*Skills

The national academic skills lists provide educators with an easily read, quickly decoded index of skills which the student has mastered or is working on in the major teaching fields of Reading, Math, Early Childhood and Oral Language. The MSRTS Skills are not a prescription, curriculum or evaluation tool. The skills have been grouped into areas of emphasis to enhance communication between teachers and to expedite program planning. The following pages consist of samples from the MSRTS Academic Skills Booklets.

Reading

10-Readiness: Informal, sequenced activities prerequisite to reading.

020 Visual Discrimination: Skill in distinguishing word forms.

02001 Identifies (1) shapes, (2) colors, (3) objects, (4) letters.

02002 Identifies likeness/differences in (1) shapes, (2) colors, (3) objects, (4) letters.

02003 Copies (1) shapes, (2) upper/lower case letters, (3) words.

02004 Matches letter/name/symbol in a word.

040 Visual Memory: The amount remembered after seeing.

04001 Places forms on a board, 2-4 piece puzzle.

04002 Identifies (1) missing parts, (2) pictures, (3) letters.

04003 Reproduces from memory (1) shapes, (2) pictures, (3) letters.

04004 Identifies missing objects from more than 5.

Oral Language

10-Oral Directions: Performing a task from oral instructions.

020 Simple: One step.

_____ Follow a one-step oral instruction.
(sit down/stand up)

040 Complex: Two or more steps.

_____ Follow two or more step oral instructions.
(Go to the desk and bring me the pencil).

Early Childhood

PG01 Lifts Head Briefly When On Stomach

When placed on stomach, the infant can lift head an inch or two from the surface of the crib or table for a few seconds.

PG02 Turns Head To Avoid Annoyances

The infant can turn head to avoid an annoying sound or disturbing object.

PG03 Rolls Part Way To Side From Back

When placed on back, the infant can roll onto one side.

Math

SUBTOPICS

070 Numerals and Associated Word Names

GIVEN	THE STUDENT	EXAMPLE
07001 A. The numerals 0—9	Names the numerals	3 (three)
B. Word names "zero" to "nine"	Identifies the numerals corresponding to the word names	0 (zero)
07002 A. The numerals 10, 20, 30, . . . 100	Names the numerals	40 (forty)
B. Word names "ten", "twenty",	Identifies the numerals corresponding to the word names	70 (seventy)

Gabriela Espino is one of hundreds of children of migrant workers who attend school in the summer. Here, she works with an Abacus-like device during math class.

V81 SPECIAL SCREENING FOR CARDIOVASCULAR, RESPIRATORY, AND GENITOURINARY DISEASE
 06/01/81 EHC - 127459 - REPORTED FOR SCYXEB BY SCBPRC
 ICD - V81.1 - BLOOD PRESSURE
 CPT - 90751 - INITIAL HISTORY AND EXAMINATION (AGE 12 THROUGH 17 YEARS)
 OUTCOME - NORMAL - 106/66
 ICD - V81.51 - URINALYSIS
 CPT - 81002 - URINALYSIS, DIPSTICK
 OUTCOME - NORMAL

IMMUNIZATION DATA

V04 NEED FOR PROPHYLACTIC VACCINATION AND INOCULATION AGAINST CERTAIN VIRAL DISEASES
 ICD - V04.01 - POLIO ORAL
 06/18/79 EHC - 123451 - REPORTED BY FLEBCD ON 08/02/75
 08/23/79 EHC - 123451 - REPORTED BY FLEBCD ON 08/02/75
 11/10/71 EHC - 123451 - REPORTED BY FLEBCD ON 08/02/75
 08/02/75 EHC - 123451 - REPORTED FOR FLEBCD BY FLEBCD ON 08/02/75

V06 NEED FOR PROPHYLACTIC VACCINATION AND INOCULATION AGAINST COMBINATIONS OF DISEASES
 ICD - V06.1 - DIPHTERIA-TETANUS-PERTUSSIS COMBINED (DTP)
 06/18/79 EHC - 123451 - REPORTED BY FLEBCD ON 08/02/75
 08/23/79 EHC - 123451 - REPORTED BY FLEBCD ON 08/02/75
 10/31/71 EHC - 123451 - REPORTED BY FLEBCD ON 08/02/75
 11/10/71 EHC - 123451 - REPORTED BY FLEBCD ON 08/02/75
 08/02/75 EHC - 123451 - REPORTED FOR FLEBCD BY FLEBCD ON 08/02/75

ICD - V06.4 - MEASLES-MUMPS-RODELLA (MMR)
 07/01/71 EHC - 123451 - REPORTED BY FLEBCD ON 08/02/75

LISTING OF HEALTH PROBLEMS BY PROBLEM TYPE AND ENCOUNTER DATE

UNRESOLVED CHRONIC

478 PERITONSILLAR ABSCESS
 03/05/78 EHC - 379429 - REPORTED FOR FLEBCD BY FLEBCD
 ICD - 478 - PERITONSILLAR ABSCESS
 CPT - 42700 - INCISION AND DRAINAGE ABSCESS, PERITONSILLAR
 OUTCOME - NORMAL
 RX - TRICRYCIN

06/11/81 EHC - 794049 - REPORTED FOR SCYXEB BY SCBPRC
 ICD - 478 - PERITONSILLAR ABSCESS
 CPT - 42700 - INCISION AND DRAINAGE ABSCESS, PERITONSILLAR
 OUTCOME - NORMAL
 ICD - 42720 - RETROPHARYNGEAL OR PARAPHARYNGEAL - INTRADURAL APPROACH
 OUTCOME - NORMAL
 RX - TRICRYCIN

493 ASTHMA
 04/01/81 EHC - 134979 - REPORTED FOR FLEBCD BY FLEBCD
 ICD - 493.1 - INTRINSIC ASTHMA
 CPT - 31620 - BRONCHOSCOPY-DIAGNOSTIC - RIGID BRONCHOSCOPE
 OUTCOME - NORMAL
 RX - DEXTROTHETOPHAN

UNRESOLVED ACUTE

034 STREPTOCOCCAL SORE THROAT AND SCARLET FEVER
 07/20/81 EHC - 794049 - REPORTED FOR MUMPS BY MUMSIN
 ICD - 034.0 - STREPTOCOCCAL SORE THROAT
 CPT - 87060 - THROAT CULTURE
 OUTCOME - ABNORMAL - FOLLOWUP 08/01/81
 RX - AMPICILLIN
